COLOUR

Nl deep navy

#003087

Tile, "DP", headings

Sky

#0087c8

Thrusters, "Trainer"

Accent (day)

#0069b4

Buttons, links, labels

White

#ffffff

Ring, dot, "DP" on dark

Night bg

#0a1628

Panel #0f2040

Muted text

#6b87a0

Night #5a82a0

DO

Keep clear space of at least the icon's own height on all sides.

Flip "DP" to white on any background darker than #0f2040.

Below a lockup's minimum width, drop the wordmark and use the icon alone.

Use the maskable icon files for Android — they carry the 10% safe inset.

Convert text to outlines before any commercial print run.

TYPE

Inter

One family throughout. **DP** at 700, Trainer at 300, taglines at 300.

SVG stack: Inter → Helvetica Neue → Arial. PNGs are pre-rendered in Inter — use them wherever the font may be missing.

DON'T

Recolour, rotate, outline or add effects to the mark.

Stretch it — scale proportionally only.

Set the navy tile on a navy background, or sky on sky.

Rebuild the wordmark by typing it — always use the supplied files.

Use the full-bleed square PNGs as Android adaptive icons.

WHERE THE FILES LIVE
